The new Sharp UP-3300 is a full colour touch screen EPOS terminal developed specifically for the hospitality environment.

Unique in the UK, it's a parameter driven terminal that's easy to install and set up.

Best of all, it's easy for staff to use - essential where labour turnover is high.

It has a common sense menu-driven structure, and by using colour to group products together, it lets operators enter transactions quickly and accurately.

Powerful restaurant features include Table Transfer and Bill Splitting, and the UP-3300 is fully Euro compatible.

On-line communications allow connection to back office software for sales analysis reports and input to accounting packages.

The Sharp UP-3300 - so advanced, but so easy.
